Einschubelement Design element Insert Elemento inseribile Elementos de inserción Elementu dekoracyjnego	Höhe height hauteur altezza altura wysokość C  x = NL - 33 D  x = NL - 33	In Kombination mit TANDEMBOX antaro ist aufgrund der vorgegebenen Abmessungen, laut Norm (DIN EN 14749 Ausgabe Nov. 2005) keine „Schlagprüfung für vertikale Glasbauteile“ vorgeschrieben. Somit ist für die Normerfüllung kein Sicherheitsglas erforderlich. In combination with TANDEMBOX antaro no impact test for vertical glass components is stipulated due to the dimensions given, see standard (DIN EN 14749 release Nov. 2005). Safety glass is not required in order to comply with the standard. La norme DIN EN 14749, édition nov. 2005, ne stipule pas un « Essai d'impact sur surfaces verticales en verre » en combinaison avec TANDEMBOX antaro suite aux dimensions données. Pour répondre à la norme l'utilisation de verre sécurit n'est donc pas nécessaire. In base alla normativa (DIN EN 14749 pubblicazione nov. 2005) in combinazione con TANDEMBOX antaro non è obbligatoria alcuna „prova d'impatto per componenti in vetro verticali“. Di conseguenza per il rispetto delle norme non è necessario alcun vetro di sicurezza. En combinación con TANDEMBOX antaro es según las medidas definidas, la norma (DIN EN 14749 edición Nov. 2005) ningún “Ensayo de golpe para componentes de vidrios en vertical” reglamentado. Por consiguiente no es necesario vidrio de seguridad para cumplir la norma. Z powodu podanych wymiarów, według normy (DIN EN 14749 wydanie listopad 2005) nie ma zaleceń odnośnie „Testu uderzenia dla pionowych elementów konstrukcyjnych ze szkła“. Zatem norma nie wymaga stosowania szkła hartowanego.
